

Global Health at the Public Health Institute

ABOUT PHI

The Public Health Institute (PHI) is dedicated to improving the health, well-being and quality of life for people around the world. PHI is expert in building local capacity, strengthening health systems and training public health leaders and health advocates at community, district and national levels. Known throughout its 40-year history for strong leadership development, innovation and technical depth, PHI today has more than 600 employees in the United States and 26 countries around the world. PHI's work is guided by the belief that health is a fundamental human right and that just societies ensure equitable health outcomes for everyone.

Our portfolio of global health projects is diverse, ranging in size, scope and location. Following are just a few of the areas in which we have expertise:

- Reproductive and sexual health
- Adolescent and youth health
- Chronic disease prevention
- Alcohol and tobacco control
- HIV/AIDS prevention
- Disabilities
- Climate change and public health

OUR GLOBAL SCOPE

To engage communities to build capacity and strengthen health systems, PHI has trained thousands of providers, policymakers and advocates from diverse settings in all regions of the world. We have recruited and supported experts and practitioners at early, mid-career and senior levels, providing them with training, professional development and seed grants, and managing fellowships and staff assignments for them at nongovernmental, bilateral and multilateral organizations as well as private foundations.

While we design and provide short courses, technical assistance, personnel management and sub-granting on a small scale, we also operate globally, implementing, for example, the Global Health Fellows Program (GHFP) under a five-year USAID cooperative agreement. Through GHFP, PHI manages and mentors more than 120 public health professionals who work alongside USAID staff at headquarters and around the world.

OUR STRENGTHS

PHI is particularly engaged in addressing the health needs of marginalized communities, as well as enhancing community and country-level capacity for health promotion and management. We excel in the following technical assistance specialties:

- Leadership development
- Innovation and technology
- Organizational capacity building
- Program evaluation
- Health policy and advocacy
- Human resource development
- Public-private partnerships
- Grants administration
- Technical training
- Fellowship and scholarship training and management

The Public Health Institute, an independent nonprofit organization, partners with public and private institutions such as universities, foundations, corporations, local and international nongovernmental organizations and government agencies.

Global Health at the Public Health Institute

The Public Health Institute (PHI) is dedicated to improving the health, well-being and quality of life for people around the world. PHI is expert in building local capacity, strengthening health systems and training public health leaders and health advocates at community, district and national levels. Current global health projects include:

Adolescent Girls Advocacy & Leadership Initiative

Location: Multiple Latin American and African countries; Funder: United Nations Foundation

Enhancing the capacity of leaders to improve the health, education and livelihoods of adolescent girls and young women in Central America and sub-Saharan Africa, with a focus on leadership development and advocacy

Cross-National Analysis of Alcohol and Injury

Location: Multiple countries; Funder: National Institute on Alcohol Abuse and Alcoholism

Exploring the association of alcohol and injury with national context variables such as per capita consumption and detrimental drinking patterns, and identifying gaps in research, including the risk of injury due to alcohol by type and cause of injury

Culture and HIV Prevention in Cambodia

Location: Cambodia; Funder: University of California, San Francisco

Exploring what young high-risk women think about culture and HIV risk, HIV infection and prevention technologies

Epidemiology of Drinking and Disorders in Border and Non-border Contexts

Location: Mexico and U.S.; Funder: National Institute on Alcohol Abuse and Alcoholism

Describing and explaining alcohol use patterns and related problems among Mexican-origin adults living in metropolitan areas on each side of the Texas-Mexico border

European & American Drinking Contexts: Comparative Study of Young Adults

Location: Belgium, Italy, France, the Netherlands, U.S., Canada; Funder: Permanent Observatory on Youth and Alcohol

Analyzing comparative drinking contexts for young adults in four European countries and the U.S. and Canada

Family Planning Technical Assistance Program

Location: Ethiopia, Nigeria, Pakistan and India; Funder: The David and Lucile Packard Foundation

Providing short- and long-term technical assistance to support family planning/reproductive health, program development, service improvement and practice of effective leadership

Global Health Fellows Program

Location: Multiple Countries; Funder: United States Agency for International Development (USAID)

Improving the effectiveness of USAID's population, health and nutrition programs overseas by recruiting interns and fellows to work in conjunction with USAID staff to develop and increase the capacities of health professionals

Improving Girls' Education in Northern Nigeria

Location: Northern Nigeria; Funder: David and Lucile Packard Foundation

Promoting education for girls by developing policy-oriented activities that transform traditional and religious leaders into effective advocates for girls' education

(continued)

www.phi.org

Mobility of Health Professionals

Location: Multiple countries; Funder: Scientific Institute of the German Medical Association

Investigating and analyzing current trends of the migration of health professionals to, from and within the European Union.

Partnerships with the Private Sector to Mobilize Local Resources for Health

Location: Indonesia; Funder: Ford Foundation

Facilitating mutually beneficial partnerships among companies, nongovernmental organizations and local governments to improve workplace and community health in Indonesia, particularly by reaching more women with health-related services and resources

Puentes de Esperanza — Binational Alliance for the Treatment of Multi-Drug Resistant Tuberculosis (MDR-TB) in the Californias

Location: California-Baja California region; Funder: World Learning/USAID

Creating and supporting a binational alliance of providers and organizations dedicated to developing capacity to treat MDR-TB patients by creating the infrastructure to support early recognition of affected patients and outreach services to assist patients with successful adherence to treatment

Smoke-Free International Training Program

Location: Multiple countries; Funder: Multiple

Providing courses and guides to help public health officials and enforcement agencies implement the World Health Organization's Framework Convention on Tobacco Control's provision for a smoke-free environment

Substance Use and HIV Risk Behaviors among Thai Women

Location: Thailand; Funder: National Institute on Drug Abuse

Developing theoretical HIV prevention models that include sociocultural factors specific to female and male-to-female transgender sex workers in order to curb HIV/STI transmission

Tobacco Control Policy Analysis & Intervention Evaluation in China and Indonesia

Location: China and Indonesia; Funder: Fogarty International Center, National Institutes of Health

Making the economic case for tobacco control in China and Indonesia

Youth Leadership in Sexual and Reproductive Health Program (GOJoven)

Location: Belize, Guatemala, Honduras and Mexico; Funder: The Summit Foundation

Building individual, organizational and community capacity to improve adolescent sexual and reproductive health outcomes in Mesoamerica through youth leadership and capacity-building workshops and trainings

Youth Sexual and Reproductive Health in Cancun (CHISPAS)

Location: Quintana Roo, Mexico; Funder: The Summit Foundation

Improving adolescent and youth sexual and reproductive health and rights in order to empower youth and reduce the levels of HIV/AIDS, sexually transmitted infections and unplanned pregnancies
